

CHAPTER 5

EMPLOYMENT AND UNEMPLOYMENT

Employment

As per Census 2001, population of Delhi was 138.50 lakh. In 2011 census, the population of Delhi increased to the level of 167.88 lakh which indicate the fact that on an average, population of Delhi increased at 2.12 per cent per annum during 2001-2011. During the same period the proportion of working population to the total population in Delhi increased at the rate of 0.46 per cent. The information regarding population, working population and non-workers in India and Delhi during 1981-2011 is presented in Statement 5.1.

Statement 5.1

Note: - Figures in parenthesis relate to percentage to total.

- 1.2 It may be observed from Statement 5.1 that the work participation rate in Delhi during 1981 was 32.19 per cent, reduced to 31.63 per cent in 1991 and slightly increased at 32.82 per cent in 2001 & now in 2011 is 33.28. The growth of workers in Delhi during 1981-2001 was worked out at 6.35 per cent per annum while non-workers were at 6.03 per cent per annum. This was same in the case of national level; where the growth of workers outweighs the growth of non-workers and the difference was worked out at 1.11 per cent per annum during the same period. This clearly indicates the fact that the work participation rate has enhanced both in national level and Delhi. As Delhi is almost a fully urbanized state in the Indian Union, the growth of workers and non-workers were higher than the national level. During the same period the percentage contribution of workers, non-workers in Delhi increased simultaneously with the increase in population. The more details regarding the growth of workers and non-workers in Delhi and India during 1981-2001 are presented in Statement 5.2.

- 1.3 According to Census, main workers were those who were engaged in any economically productive activity for 183 days (or six months) or more during the year. While marginal workers were those who worked for less than 183 days (or six months) in a year. Generally workers category includes both main and marginal workers. The classification of workers, i.e main and marginal workers, non-workers and population of Delhi during the last five censuses is mentioned in Statement. 5.3.

Note: - Figures in parenthesis relate to percentage to total population.

- 1.4 It may be inferred from Statement 5.3 that one third of the total population in Delhi was taking care of remaining two third of the population. It is generally called dependency burden of the working class. It is also observed from the above table that during 1961 and 1971 census not provided the information regarding main and marginal workers and mentioned only in the category of workers. The last census showed the highest percentage of marginal workers at 5 per cent of the workers in Delhi. The information regarding workers, non-workers and population in Delhi during 1961-2011 is depicted in Chart 5.1.

Chart 5.1

Workers, Non-workers & Population of Delhi: 1961 - 2011

- 1.5 The general phenomenon found in most of the urbanized areas is that the percentage of persons engaged in primary agriculture sector is very low. Delhi is also showing the same way, while the persons employed in service sector and industrial sectors constitute a major share. The information regarding category-wise workers (including main and marginal workers) in Delhi during 2011 is presented in Statement 5.4.

2.3 National Sample Survey Organization

The National Sample Survey office collects data on the characteristics of Labour Force (Employed & Unemployed) through various rounds of the N.S.S.O. Since 1972-73, the survey on Employment–Unemployment has become a part of the quinquennial programme of NSSO surveys. The persons surveyed are classified into various activity categories on the basis of activities pursued during certain specified reference periods as Usual Status, Current Weekly Status and Current Daily Status. These are defined as under:-

- a. **Usual Status:** A person is considered working or employed if the person was engaged for a relatively longer period in any one or more work related (economic) activities during the reference period of 365 days preceding the date of survey.
- b. **Current Weekly Status:** A person is considered working or employed if the person was engaged for at least one hour on any one day on any work related (economic) activity during the reference period of seven days preceding the date of survey.
- c. **Current Daily Status:** A person is considered working for the entire day if he had worked four hours or more on any day of the reference week preceding the date of survey.

3 Organized Sector Employment in Delhi

- 3.1 As the capital city of the country, Delhi accommodates almost all the government offices. Thus job opportunities in the government sector are in plenty. Among all the jobs available, aspirants choose from the administrative, financial, management and executive level jobs of their choice. These jobs have pretty and lucrative remuneration offer.
- 3.2 Private sector in Delhi also has started showing a sign of strength as their global competitors. Irrespective of the verticals, growing opportunities in the sector make the candidates highly enthusiastic about the growth, value and prospects emerged in the sector. Jobs in Delhi are available in almost all the prominent industry verticals including healthcare, pharmaceutical, media, entertainment, information technology, information technology enabled services, various other service related activities etc. The big players of the industry have established their offshore centers at various places in Delhi to conduct their operations efficiently. The information regarding organized sector employment in Delhi during the last one decade is presented in Statement 5.6.

4 Unemployment Scenario in Delhi

- 4.1 Generally a person who is able and willing to work but unable to find a suitable job is considered as unemployed. The unemployment rate is the number of unemployed workers divided by the total number of labour which includes both the unemployed and those with jobs (all those willing and able to work for pay) or Unemployment rate refers to number of persons unemployed per 1000 persons in the labour force. In practice, measuring the number of unemployed workers actually seeking work is notoriously difficult. There are several different methods for measuring the number of unemployed workers. Each method has its own biases and the different systems make comparing unemployment statistics between countries, especially those with different systems, difficult.
- 4.2 As per the latest NSSO Survey, the estimated number of unemployed persons in Delhi was around 2.66 lakh during June 2012. The detail regarding the estimated number of employed and unemployed persons in Delhi during 2012 is presented in Statement 5.7.
